

Development and Use of Your State MEP's Logic Model: A Way to Ensure SDP and Evaluation Success!

Edward Monaghan, OME
Preeti Choudhary, OME
August 30, 2017

The mission of the Office of Migrant Education is to provide excellent leadership, technical assistance, and financial support to improve the educational opportunities and academic success of migratory children, youth, agricultural workers, fishers, and their families.

Agenda / Objectives

- Provide participants ideas on how to develop their State MEP's logic model.
- Demonstrate that a logic model is a visual representation for a State MEP's Service Delivery Plan.
- Engage participants in determining evaluation questions that arise out of their State MEP's logic model.

WebEx Instructions

- Today, we'll use the computer, rather than the call-in phone line.
- Participants may ask questions during appropriate times in the webinar, or enter them in the chat box.
- Please complete our evaluation!

Statute

Title I, Part C, Sections 1301(4); 1303(e); 1304(b)(1) and (2); 1304(c)(5); 1304(d); 1306(a)(1)(C) and (D).

Code of Federal Regulations

34 CFR 200.1-200.8; 200.83; 200.84; 200.85.

Guidance

MEP Guidance, March 2017. Chapter IV. CNA and SDP, pages 43-52; Chapter VIII. Program Evaluation, pages 84-95.

HOW TO DEVELOP A LOGIC MODEL:

- * **WHAT IS A LOGIC MODEL**
- * **A LOGIC MODEL – IN PLAIN ENGLISH**
- * **ELEMENTS OF A LOGIC MODEL**
- * **IF-THEN RELATIONSHIPS**
- * **LOGIC MODEL EXAMPLES**
- * **LOGIC MODEL BENEFITS**

What is a Logic Model?

“A logic model is a visual representation of the assumptions and theory of action that underlie the structure of an education program.”

IES, 2014

A Logic Model – In Plain English

“If you don’t know where you are going, how are you gonna’ know when you get there?”

Yogi Berra

Where are you going?

How will you get there?

What will show that you’ve arrived?

Elements of a Logic Model

1

2

3

4

5

Your Planned Work

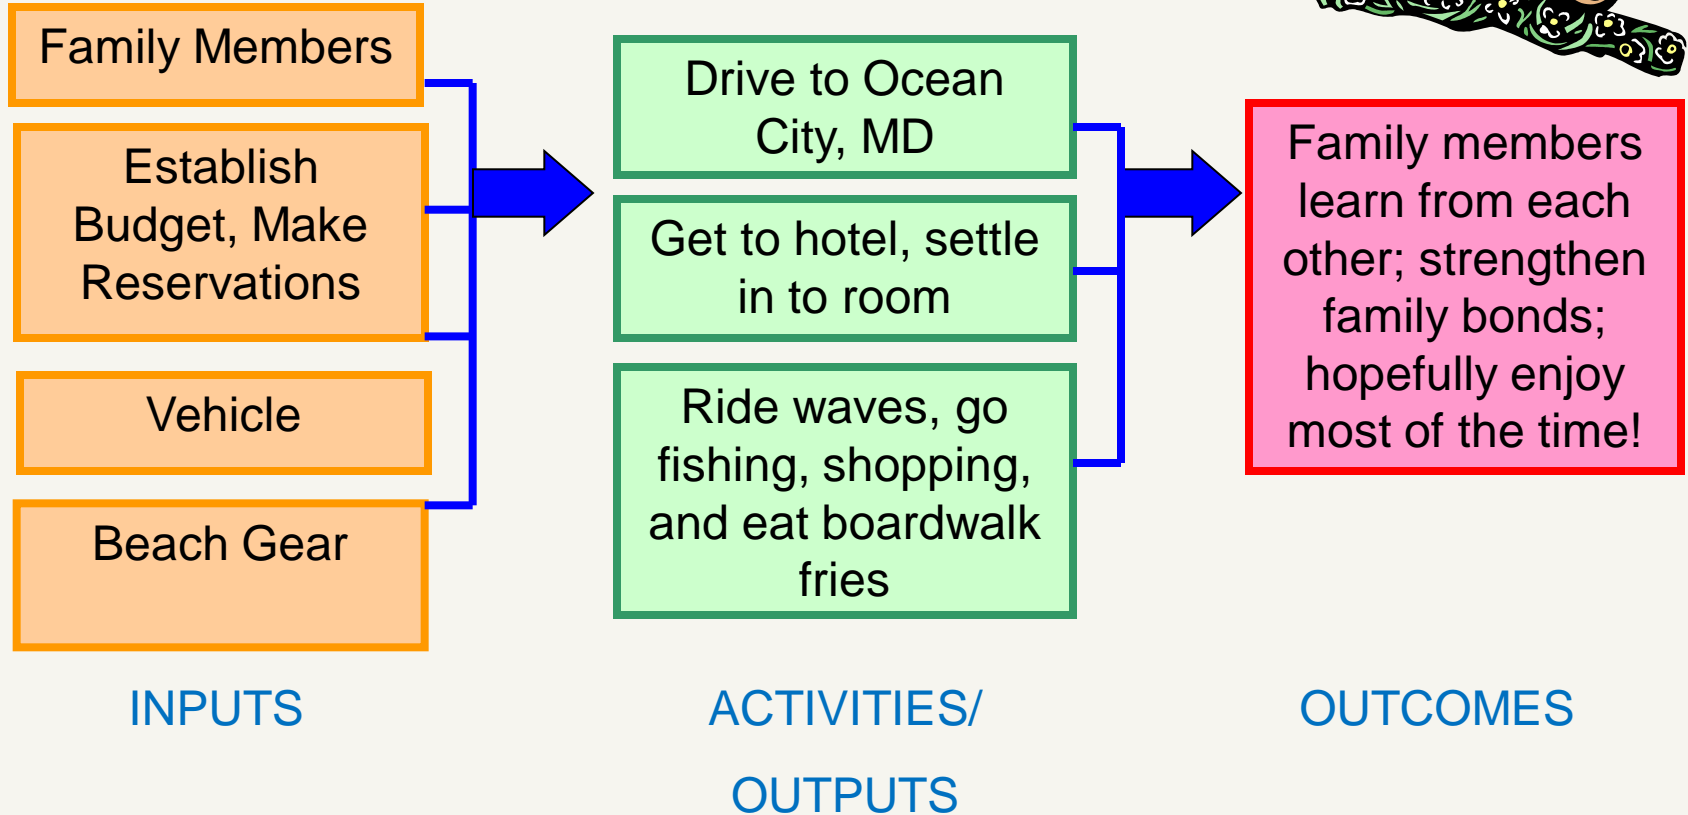

Your Intended Results

If-Then Relationships

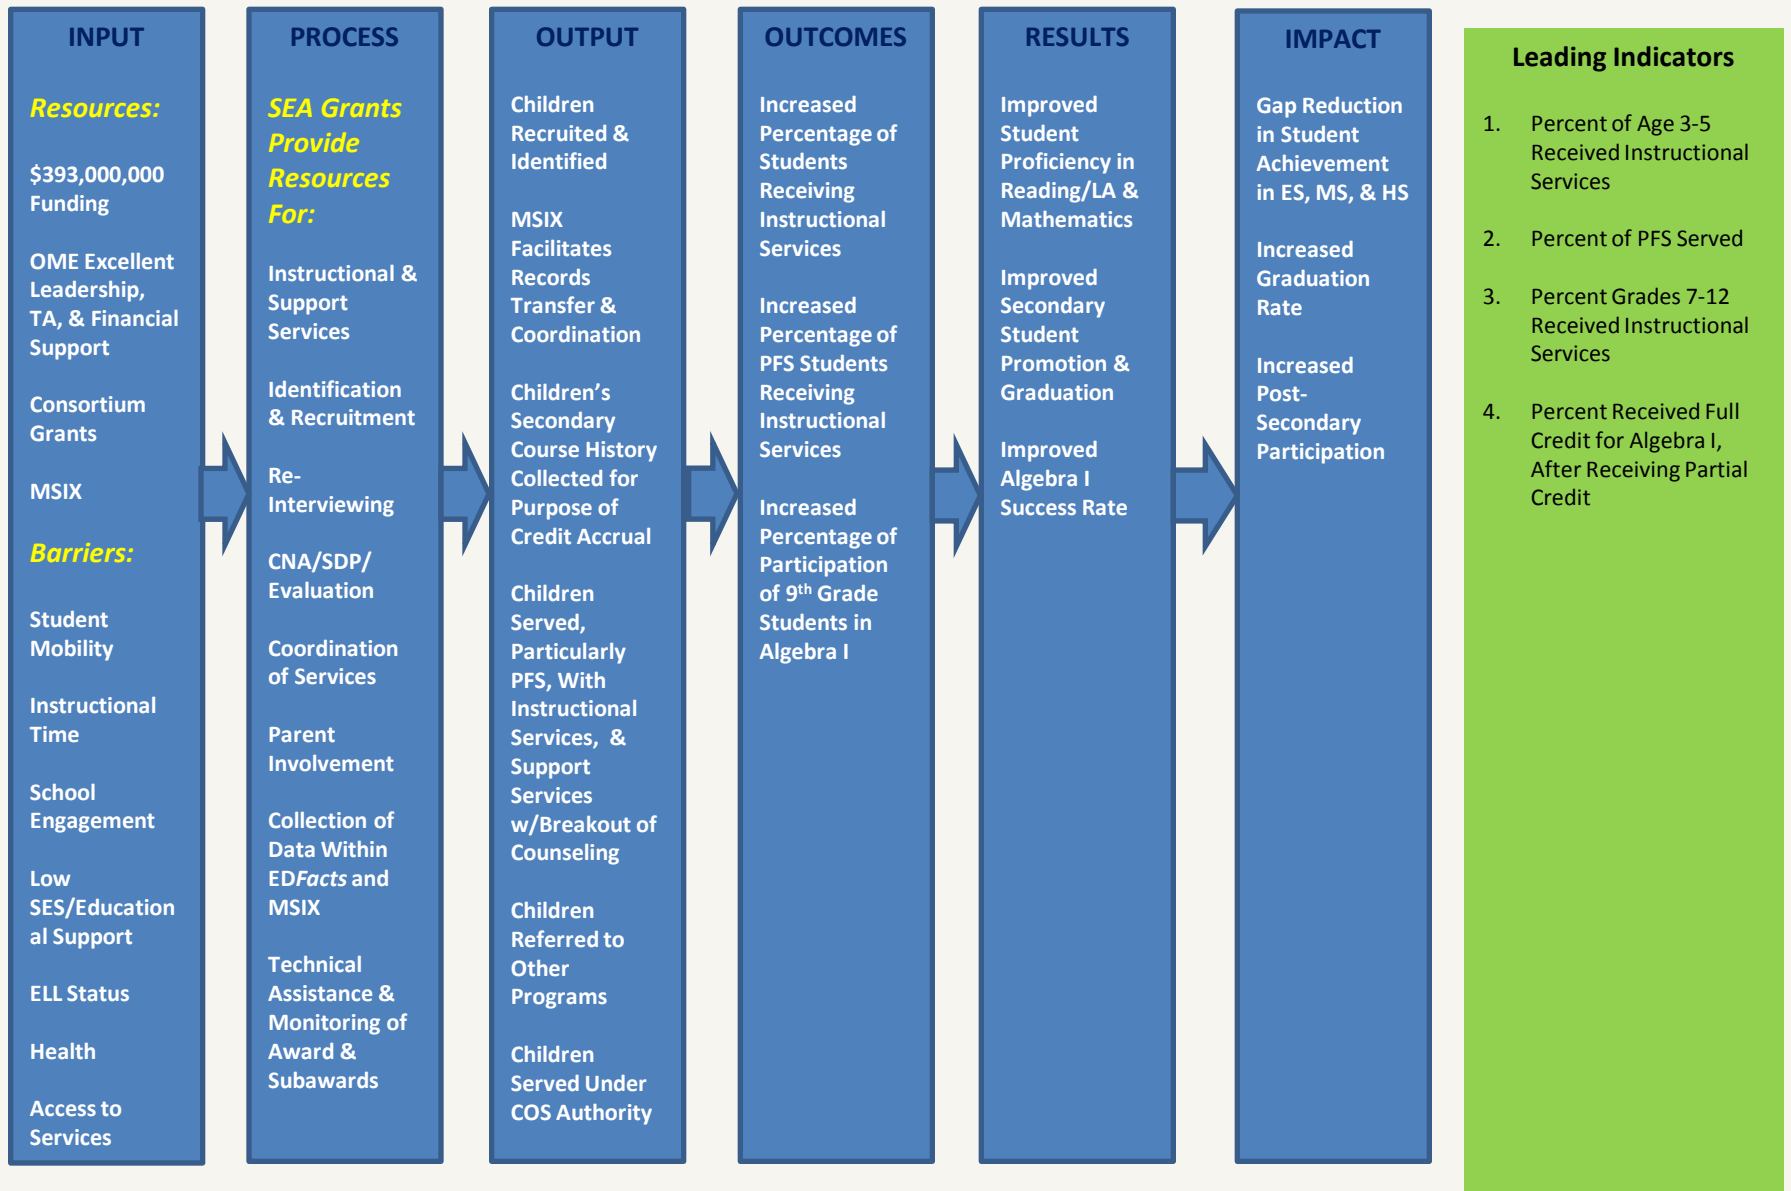

Underlying a logic model is a series of ‘if-then’ relationships that express the program’s **theory of change**.

Logic Model – Family Vacation

Migrant Education Program Logic Model

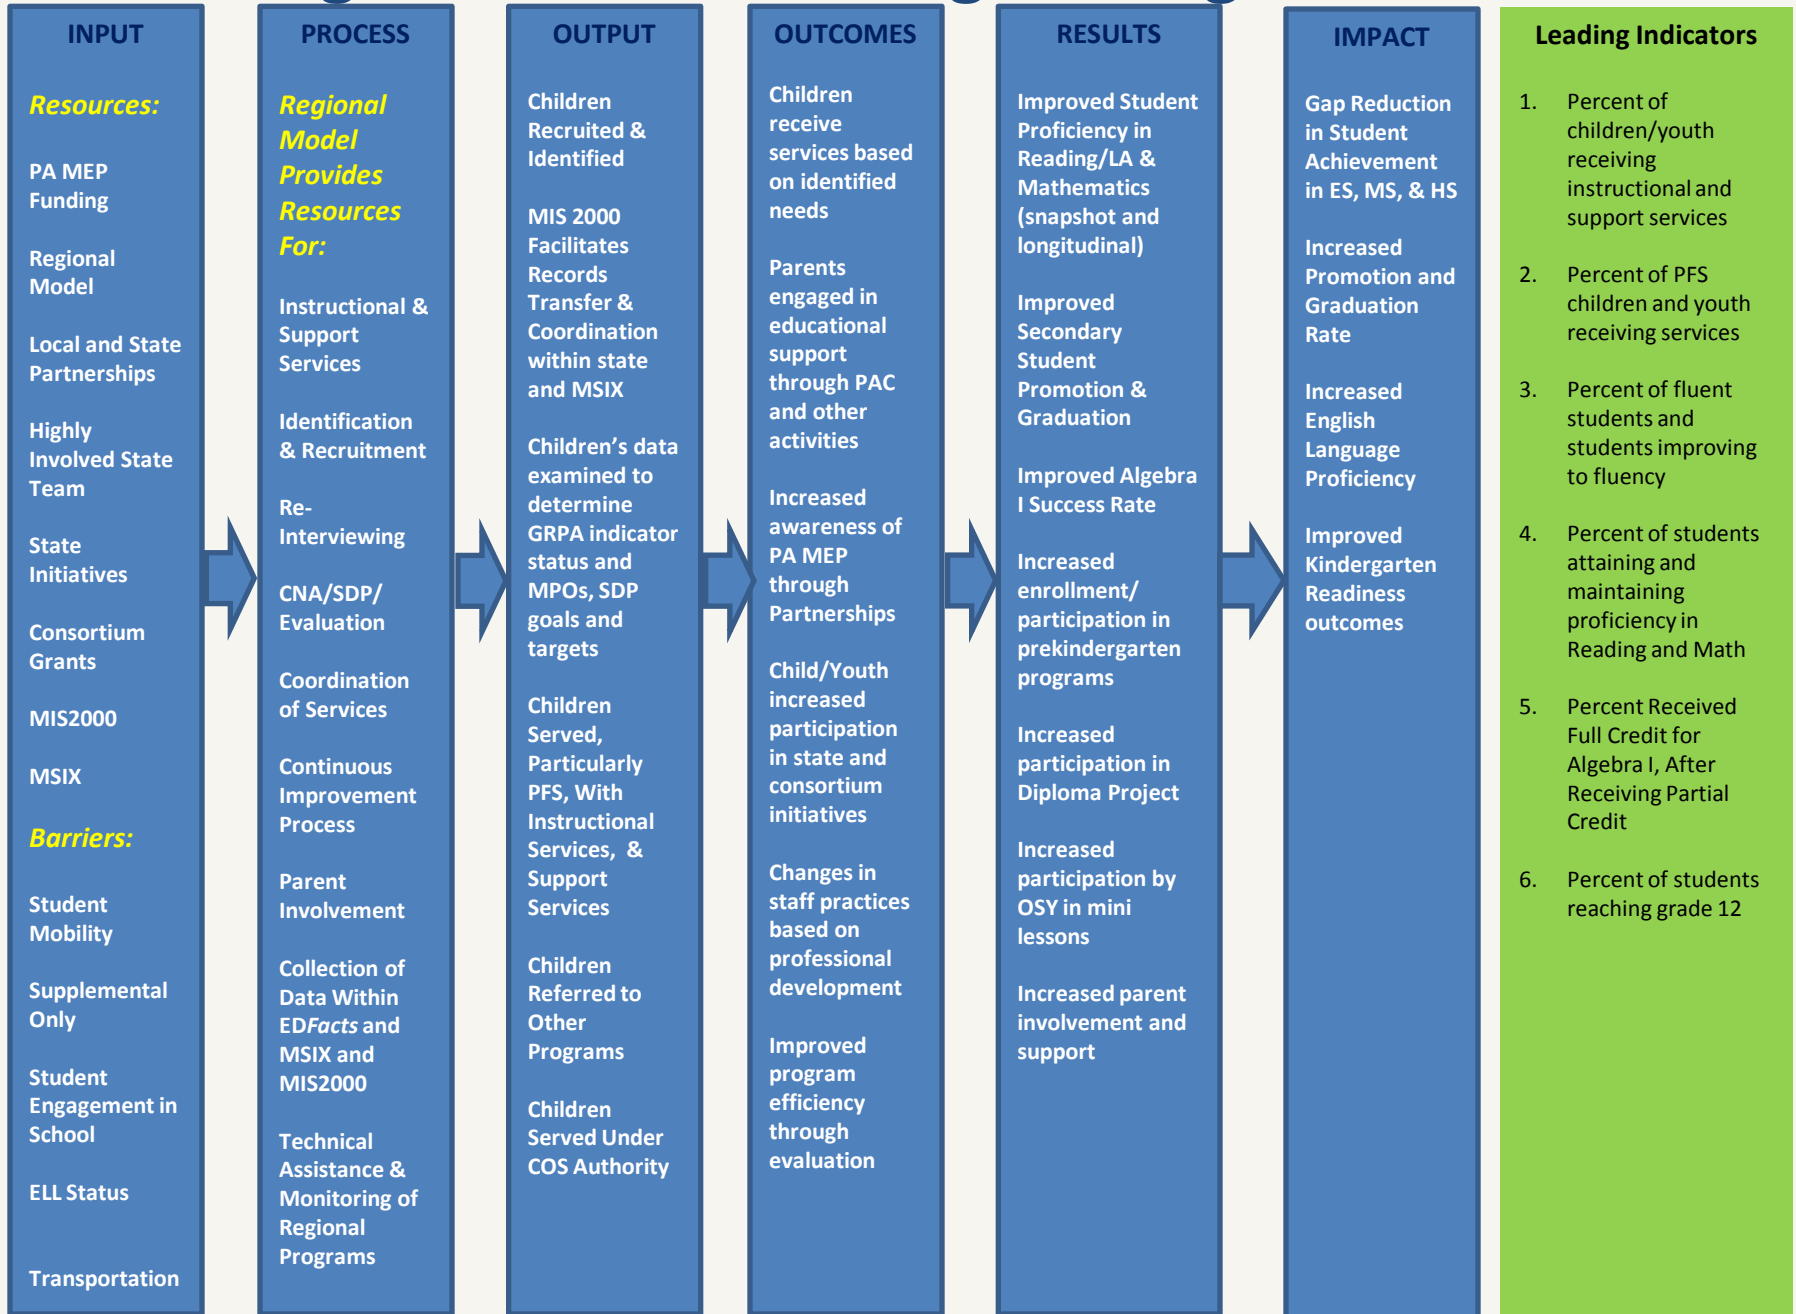

Pennsylvania MEP Logic Model Example

- Carmen Medina, PA MEP Director
- Yolanda Yugar, PA MEP Evaluator

PA Migrant Education Program Logic Model

Questions for MEP Director

- Please place a question in the chat box.
- We may ask you to elaborate on that question.

Logic Model Benefits

- Provides a common language
- Helps us differentiate between “what we do” and “results” --- **outcomes.**
- Guides and helps focus work.
- Helps to identify important variables to measure.
- Helps organize your program’s evaluation.
- Helps explain your program’s evaluation to stakeholders.
- Shows stakeholders your program’s improvements and performance results (formative and summative).

LOGIC MODEL = VISUAL REPRESENTATION FOR A STATE MEP'S SDP:

- * SDP TOOLKIT LOGIC MODEL (FIGURE E.1)
- * LOGIC MODEL ALIGNMENT

If you want migrant students to achieve the state performance targets, then the MEP will need to address these needs.

If you achieve the MPOs, then migrant students will contribute to achieving the state performance targets

State Performance Goals/Targets

Needs and Concerns

Measurable Program Outcomes Established

Measurable Program Outcomes Achieved

Strategies Selected

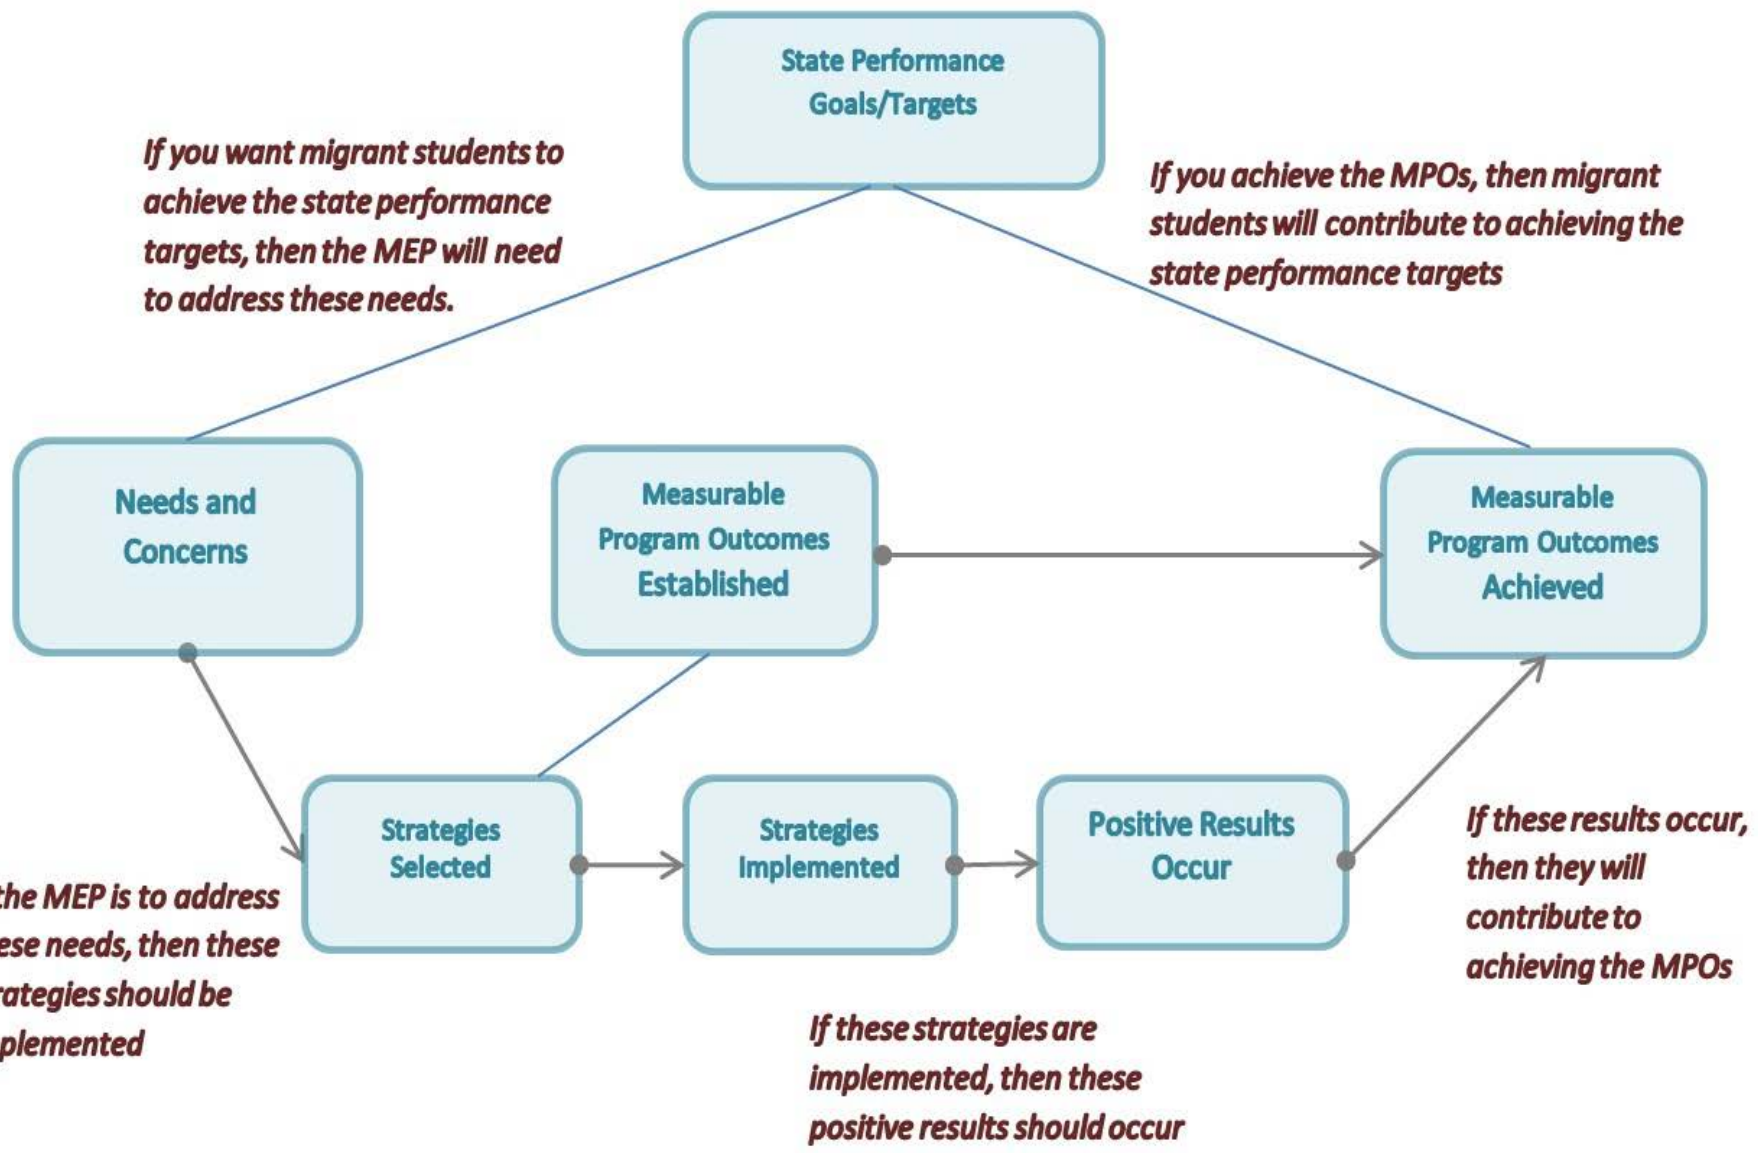

Strategies Implemented

Positive Results Occur

If the MEP is to address these needs, then these strategies should be implemented

If these strategies are implemented, then these positive results should occur

If these results occur, then they will contribute to achieving the MPOs

Logic Model Alignment: Performance Targets and MPOs

The Migrant Education Program (MEP) must contribute to achieving the state performance goals and targets. Once strategies are selected to address the needs identified in the Comprehensive Needs Assessment (CNA), then the planning team will develop MPOs to articulate what results you want to see in migrant children who participate in the MEP. The MPOs not only logically follow from the strategies, but they also should help migrant students achieve the state performance targets. (SDP Toolkit, E-2)

Logic Model Alignment: Strategies and MPOs

If the strategies and MPOs do not lead to improving migrant student performance related to state performance targets, then they do not belong in the SDP. If the strategies are thoughtfully selected and implemented, then the results should lead to achieving the MPOs. If the MEP achieves the MPOs, then in a well-conceived plan, migrant students will achieve the state performance targets, which will contribute to the state's achieving its performance goals. (SDP Toolkit,E-2)

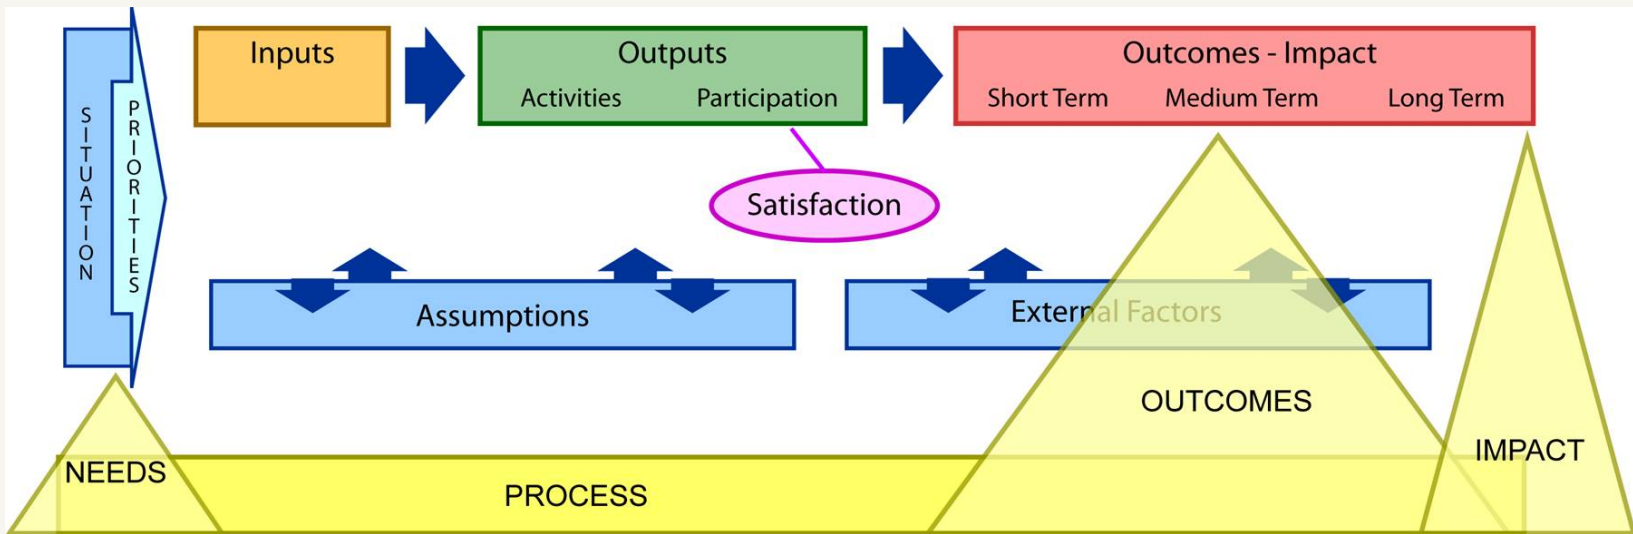

EVALUATION QUESTIONS:

- * YOUR STATE EVALUATION –
QUESTIONS YOU WANT ANSWERED
- * TYPES OF EVALUATION QUESTIONS
- * WHO TO INVOLVE IN THE
DEVELOPMENT
- * USES OF YOUR STATE MEP LOGIC
MODEL

Logic Model and Common Types of Evaluation

Types of Evaluation

Needs Assessment:

What are the characteristics, needs, priorities of target population?

What are potential barriers/facilitators?

What is most appropriate to do?

Process Evaluation:

Are activities delivered as intended? Fidelity of implementation?

Are participants engaged?

Outcome Evaluation:

To what extent are desired changes occurring?

Who is benefiting/not benefiting? How?

What seems to work? Not work?

What are unintended outcomes?

Impact Evaluation:

To what extent can changes be attributed to the program?

Are more students becoming proficient in Math and ELA, and graduating from high school?

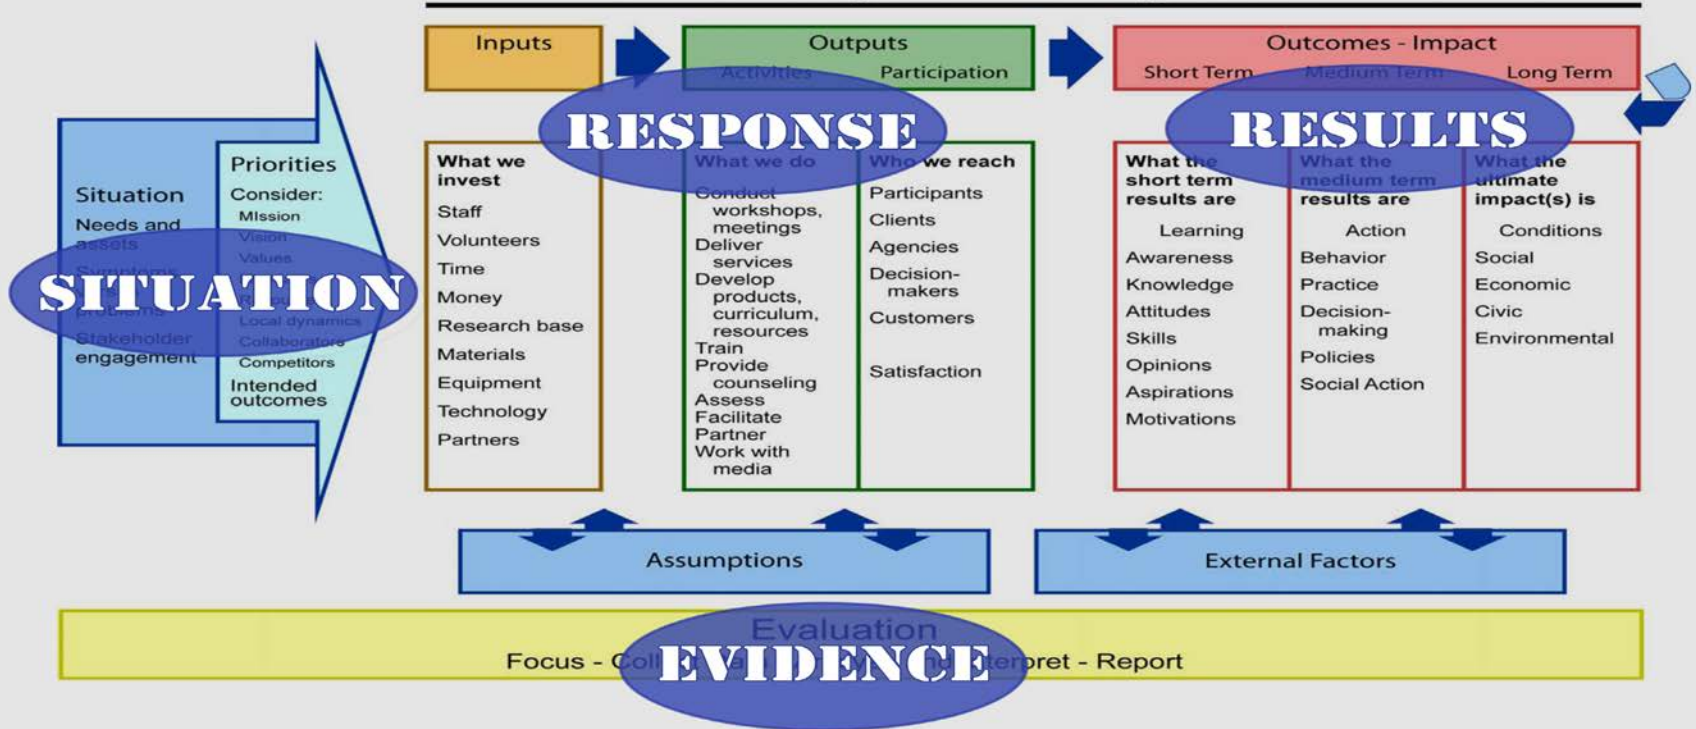

Are high school graduates increasingly participating in postsecondary education?

Summary: Logic Model and Reporting

PROGRAM DEVELOPMENT

Planning – Implementation – Evaluation

Program Action - Logic Model

Logic Model Evaluation Questions

- Develop at least one specific question that you want answered in your project's evaluation.
- Be prepared to discuss your question with directors.
- Discussion.

Logic Model Options...

- Coordinate development of your project's Logic Model with stakeholders.
- Use the Logic Model with stakeholders to communicate key aspects of your State MEP's SDP.
- Use the Logic Model to develop evaluation questions, so that your project may use data to improve services and results!

Thank You!!!

We hope you enjoyed this webinar. Please take a moment to fill out a short poll about your experience.
